THE STORY OF THREE PASSIONS

Wood • Design • Functionality

Spira is a product **made with love** under the Alps. It was designed down to the last detail, to be a **timeless design piece**, perfect in shape, proportions and balance. Each Spira product is **handmade** by skillful craftsmen, who take great pride in their work.

We only do what **inspires us** and what we truly feel **passionate** about. Focusing on every detail, **our mission** is to design and produce practical perfection. **Nothing is left to chance.**

Founder of Spira,
Luka Zajc

DARE TO USE YOUR IMAGINATION!

CREATE **HAPPY** MEMORIES

Christmas is not a season, it is a feeling.

What makes it so special?

The Christmas tree is the home of our dreams, it **celebrates life and hope for a good year to come**. People all around the world set up Christmas trees and build unforgettable moments around them.

Make it last!

Christmas time is a once-a-year occasion. But since the Christmas feelings are so warm and comforting, why not make them last? Decorate your tree with other seasonal decorations and **let the joyful season last the whole year.**

SPIRA CHRISTMAS TREE IS A **HANDCRAFTED** MASTERPIECE

Take a moment to read and understand the meticulous process and passion that is the essence of each Spira Christmas tree.

Spirals for Spira Christmas trees are made of **birch plywood**. Material is hand selected, so we ensure there is a **minimum chance of imperfections** in the visible surface and the core of the plywood.

After the spiral has been cut with a **high-precision laser cutter**, it goes into the skilled hands of Spira craftsmen, who will perform their magic to produce a Spira Christmas tree. First, each spiral is **rechecked for imperfections**, and goes into the detailing workshop if any chips and scratches are seen. After that, four strings are **hand woven** into the spiral from top to bottom to give the spiral a **perfect shape and maximum strength**. Each spiral then goes through **another quality check**. It is set as you would set it at home, so we ensure that the strings have been perfectly aligned.

Stand poles are a subject of quite similar treatment as the spirals. Stand is assembled from two sticks and it is **essential** that they are **straight**. This is why the sticks are also **hand picked** and checked for straightness before they go to the manufacturing process and once again just before they go into the package, that will be delivered to your door.

We are very proud of our product and the hand craftsmanship that comes with it. It is important to us that we can guarantee the **perfection** that is Spira Christmas tree and that you, a customer, get the product that meets the **highest possible standards**.

Treat the Spira Christmas tree with respect, and you can hand it over to your grandchildren!
